EDUCATION

Rajiv Gandhi Proudhyogiki
Vishwavidyalaya

2018 - 2022

B.Tech (Computer Science
Engineering)

ABOUT ME

A Computer Science student who is efficient in full stack development (algorithms , programming ,databases , Ops , analytics). Good at problem solving , analysis & optimization of algoArithm. I would like explore how thing will work in Industry to generate value, explore various business domain and translate business requirement to tech requirement.

PROJECTS

E-Commerce Website

- Identify and gathered functional & non-functional Requirement for E-Commerce Business.
- Design & developed Data Modeling for business requirement, It includes Conceptual, Logical and Physical data modeling.
- Broke project requirement into functionalities and plan to achieved milestone in short span of time(Sprint).
- Design & develop user interface for the website.
- Design & develop scalable rest api to serve the business KPI.
- Built automation for API performance testing using Python.
- Deployment done using docker.

Technologies : Springboot, React.js, Postgresql, Docker, Postman.

Programming : Java, JavaScript, Python, Sql.

Cloud: AWS EC2, RDS, S3.

Data Structures and Algorithms

- implemented different data structures and algorithms in c++.

SKILLSET

Programming : C++ , Java , Javascript , Shell
Programming , Python , C , SQL

Databases : Postgresql , Mysql

Deployment : Docker

Front-End Frameworks : React.js

REST Frameworks : Spring Boot

Mobile Frameworks : React Native

AWS Cloud : Amazon EC2 , S3 , RDS

Version Control : Github

Software Development Process : Agile Software
Development

Communication : Hindi , English
